# WHY DIGITAL MARKETING BETTER THAN ANY OTHER MARKETING....?

For me, a digital marketing mentor in kerala and a personly brand owner i say that Digital marketing works better because it lets you connect with the right people in the right moments, in the places they already spend their time.

In deeply ..E-marketing / Internet marketing (online) The best means of reaching people these days is through the web. Rather than the old "throw everything at the wall to see what sticks" approach, digital advertising puts you in front of people who have a legitimate interest in your business. You are able to reach your audience according to their interests, activities and search such a way that every message is relevant. You'll also get no-nonsense, real-time feedback on what works and what doesn't work so you can make quick adjustment and not blow time or money. Given how much time we spend in our digital world, there are endless ways to connect - through social media, email, content, advertising - that can be used to inspire trust and hold open the door for future relationships. In the modern age, digital marketing is no longer a mere option - it's the most powerful method for growing brand and reaching your target audience.
